## 4.3.1 Institution frequently updates its IT facilities including Wi-Fi

Established in 2009, Ideal Institute of Technology, Kakinada, is dedicated to delivering quality engineering education to both urban and rural students. The campus is equipped with 240 computer systems, regularly upgraded to meet current technological standards. A skilled system administrator and maintenance team ensure smooth operation, promptly addressing any issues in offices and labs on-site to minimize disruptions.

The campus is fully Wi-Fi enabled, with a robust 100 Mbps internet connection provided since 2009. With reliable services from City-online, students and faculty have uninterrupted access to online resources, research materials, and essential educational tools.

Ideal's digital library enriches student learning by offering extensive e-journals, publications, and digital resources to support research and academic growth. This facility, alongside high-speed internet, allows students to deepen their knowledge, expand their research capabilities, and remain engaged with the latest advancements in their fields.
